CM/ECF and PACER Support for Netscape Navigator

As of March 1, 2008, Time Warner's AOL will end the development and technical support of their Netscape Navigator browser. Netscape Navigator is no longer tested or supported to work with CM/ECF or PACER. To avoid potential problems with Netscape Navigator, current versions of Internet Explorer or Firefox are available for free download from the respective vendor's website. Internet Explorer and Firefox are certified compatible with CM/ECF or PACER applications.
